DETAILED ACTION

General Status

1. This is a Final Action on the Merits. Claims 37-56 are pending in the case.

Specification

2. The amendment filed February 12, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

The amended figures 1A, 1B added more grooves than the original substrate, and amended figure 3 added a transverse slot; both the amendments are not supported by the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 37-53 and 56 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 2839

The subject matter recited in claim 37 recites "a first additional groove" and "a second additional groove"; claim 45 recites "an array of channels at least two of which each contains an intimately facing a pair of side polished optical fibers"; claim 51 recites "a rigid support ... support regions" etc., and similar recitations in claim 53 and 56. All these are not supported by the original disclosure.

Election/Restrictions

5. Newly submitted claims 54 and 55 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 54 and 55 recite method steps and the applicant elected to prosecute article claims in paper number 4.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 54 and 55 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Response to Arguments

6. Applicant's arguments with respect to new claims 37-56 have been considered but are moot as the newly presented claims are not supported by original disclosure and are claims 37-53 and 56 are rejected on the basis of 35 USC, 112, first paragraph. The in view of the new ground(s) of rejection. Claims 54 and 55 are withdrawn from consideration as the claims are directed to method of tuning optical coupling and the Applicant elected to prosecute article claims in paper number 4.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
